

HeatHaul™

Transport Cart

Fast On-Site Assembly

- Quick and easy assembly—no special tools needed
- Breaks down easily for compact transport

All-Terrain Capability

- Large pneumatic tires travel easily across lawns, gravel, and rough terrain
- Performs reliably in all weather conditions

Secure Jack Frame System

- Integrated jack frame with locking slide pins
- Simple ratchet straps provide fast, secure attachment to the gas absorption heat pump (GAHP) cabinet

Tool-Free Axle Installation

- Axles slide smoothly into the GAHP base
- Locking mechanisms ensure stability during use

The HeatHaul™ is an easy-to-use portable transport solution engineered specifically for Anesi gas absorption heat pumps. Designed for quick curb-to-installation mobility, it ensures safe and efficient handling at residential and commercial job sites.
